

FOR IMMEDIATE RELEASE

COLLINEAR, QUALCOMM, NTT DoCoMo, AND DEUTSCHE TELEKOM TO ROUND OUT PANEL DISCUSSION ON 5G GROWTH AND DEVELOPMENT AT MOBILE FUTURE FORWARD 2018 EXECUTIVE SUMMIT

Santa Clara, CA – September 25, 2018 – Collinear, developer of ultra-high capacity, over-the-air connectivity solutions for transforming network communications, will join industry leaders from Qualcomm, NTT DoCoMo, and Deutsche Telekom, on a panel to discuss 5G emerging technology trends and growth opportunities at the Mobile Future Forward Conference, October 4, 2018 from 1:30 – 2:30 pm, in Seattle, Washington.

Mobile Future Forward, the annual event produced by the strategic advisory firm Chetan Sharma Consulting, brings together executives, entrepreneurs and industry insiders to discuss transformational technologies and emerging ecosystems. This year's panel, "5G: Charting out the Roadmap," will focus on the telecommunications industry's transition into 5G – how the advancements in technology will change vertical industries, create disruption, and alter the landscape in unimaginable ways.

"There are fascinating technology trends taking place that will be inextricably connected in how they shape each other and the larger global economy," said Chetan Sharma, founder and CEO of Chetan Sharma Consulting, and moderator of the panel "It is these opportunities that we are planning to explore with some of the best minds in the business – leaders and entrepreneurs who are making fundamental contributions to our understanding of where, how, and when, the new revenue is going to be generated."

In addition to Helen Ojha, cofounder and EVP of Strategy and Corporate Development of Collinear, additional panel members will include: Seizo Onoe, Chief Technology Architect; NTT DoCoMo; Dr. Jim Thompson, CTO, Qualcomm; and Dr. Christian Von-Reventlow, Chief Digital Officer, Deutsche Telekom.

The panel will be held in St. Andrews Ballroom.

ABOUT COLLINEAR:

Founded in 2014, Collinear is pioneering next generation, ultra-high capacity, over-the-air connectivity solutions for global communication networks. Collinear has been working with Lockheed Martin Space under an exclusive licensing and development agreement to commercialize a hybrid point-to-point over-the-air transmission product developed by Lockheed Martin Space that incorporates innovative Free Space Optical (FSO) and E-Band RF technology. Initial customer trials of the company's first technology solution, Alex 1.0, commenced in the fourth quarter of 2017. The company is based in Silicon Valley, California (in Santa Clara), with an office in Singapore. For more information, please visit collinear.com.
